About Me

I am a Junior Software Developer with a BE in Computer Engineering and currently pursuing an MBA in Business Analytics. I have experience in developing diverse projects, including a deep learning-based Face Mask Detection system, a responsive Portfolio Website, and a dynamic Login and Signup system using React, SQL Server, and ASP.NET. Additionally, I created the Priyatech Solutions website. My skills are supported by certifications in Python, Data Analytics, Machine Learning, and AI. I am passionate about applying my technical expertise to solve real-world problems.

Professional Experience

Junior Software Developer

Priyatech Solutions PVT. LTD, Pune

From June 2024 to Present

- Developed and maintained software applications, ensuring high performance and responsiveness.
- Collaborated with senior developers to implement secure and efficient login and registration systems using React.
- Played a key role in launching the Priyatech Solutions website, optimizing design and functionality for improved user experience.
- Worked closely with cross-functional teams, including QA, to identify and resolve issues, ensuring timely project delivery.
